ABOUT ME

I am a full-stack developer with 5 years of experience in the design, planning, and full development of complex systems. Skilled in both server-side and client-side technologies, I have experience working across multiple platforms, utilizing a variety of tools and programming languages to bring solutions to life.

EDUCATION

UADE

Bachelor's Degree in
Information Systems
2022 - Present

Educación IT

Full stack javascript developer
2020-2022

SKILLS

- Javascript, TS, C# y Python
- Databases: relational and non-relational
- Application architecture
- Agile methodologies
- Teamwork and collaboration
- Git workflow

LANGUAGES

- Spanish (native)
- English (C1)

WORK EXPERIENCE

Globalbitz

Full stack developer - 2024 - Present

Contractor developer for a U.S.-based consulting firm. Working with TypeScript using React and Next.js on the frontend, and Express and NestJS on the backend. Database management using PostgreSQL and Prisma ORM, with integration of Azure technology for development and continuous deployment.

- Participated in the creation of a software solution for a Japanese company focused on water treatment and sanitation.
- Contributed to a sensor tracking system for electric plants for a Spanish company.

ÜMA Health IA

Full stack developer - 2022 - 2023

Worked at a company focused on implementing AI in the healthcare industry. Built microfrontend solutions using React and TypeScript. Responsible for developing microservices in Node.js (Express/Nest), integrating with Google Cloud Platform (Firestore and Compute Engine), and testing with Jest. Used Storybook and SCSS for component styling.

- Implemented features for a back-office portal for doctors.
- Developed scheduling tools for managing patient appointments.

Andreani Logistic Group

Full stack developer - 2020 - 2022

Implemented a proprietary architecture using micro-frontends in React and JavaScript, with a microservices backend in .NET 6. Integrated with OpenShift using Docker containers. Worked with MySQL and MongoDB databases.

- Development of back-office systems for the company's HRBPs.
- Creation of a portal to access different plants with location validation.

Solution developer - 2019 - 2020

Implemented the Customer Engagement module for HRBPs in Microsoft Dynamics 365. Customized applications, entities, and solutions using flows, views, and pages. Created custom implementations using jQuery scripts and .NET Framework plugins.
